1. Sorted Array	143,324	Didn't Found - Infinite Loop (No Solution)			
AVERAGE	10.000	40.000	100.000	150.000	180.000
Run Time	1,006	20,671	140,813	321,506	529,523
Expected Run Time(T^4)	26	104	330,21	555,711	684,237

Compare : Theoretically; merge,heap and shell sort should be shorter than the others

In my run times, that is true. After those; selection,bubble,quick and insertion sort take n^2 time

In my experiments, the quick sort is shorter than others. Actually, it is closer to shell and merge.

My linked list implementations takes very very long time.

In quick time, it takes 529 seconds for 180.000 data.

Moreover, I have to test 20 times for each so really I deal with with this part for a day.

Because 529 seconds means approximately 10 minutes and 20 times which is almost 3.5 hours.

Finally, I really understand this sorting and I don't think that I forget these methods forever.
